00:01:02.760 --> 00:01:05.346 The procedures apply to all chemotherapy.

00:01:11.360 --> 00:01:14.097 These safety steps will be followed every

NOTE Confidence: 0.944658

00:01:17.790 --> 00:01:19.394 Cancer hospital delivery network.
NOTE Confidence: 0.944658

00:01:19.394 --> 00:01:22.326 The first element of our safety procedures
NOTE Confidence: 0.944658

00:01:22.326 --> 00:01:25.080 occurs even before your actual treatment.
NOTE Confidence: 0.944658

00:01:25.080 --> 00:01:25.489 Start.
NOTE Confidence: 0.944658

00:01:25.489 --> 00:01:28.352 Your treatment plan is entered into the
NOTE Confidence: 0.944658

00:01:28.352 --> 00:01:31.090 computer only by your primary oncologist.
NOTE Confidence: 0.944658

00:01:31.090 --> 00:01:33.445 That is the cancer specialist
NOTE Confidence: 0.944658

00:01:33.445 --> 00:01:35.329 who knows you well.
NOTE Confidence: 0.944658

00:01:35.330 --> 00:01:37.616 And is responsible for making your
NOTE Confidence: 0.944658

00:01:37.616 --> 00:01:38.759 chemotherapy treatment decisions.
NOTE Confidence: 0.944658

00:01:38.760 --> 00:01:40.986 Your oncologist usually enters the plan
NOTE Confidence: 0.944658

00:01:40.986 --> 00:01:43.330 before your first day of treatment,
NOTE Confidence: 0.944658

00:01:43.330 --> 00:01:45.616 or what we call cycle one.
NOTE Confidence: 0.944658

00:01:45.620 --> 00:01:48.049 This treatment plan is the one that

NOTE Confidence: 0.944658
00:01:48.049 --> 00:01:50.190 you discussed with your oncologist,
NOTE Confidence: 0.944658
00:01:50.190 --> 00:01:52.476 and agreed was right for you.
NOTE Confidence: 0.944658
00:01:52.480 --> 00:01:54.574 Your oncologist will also ask you
NOTE Confidence: 0.944658
00:01:54.574 --> 00:01:56.882 to sign a consent form before
NOTE Confidence: 0.944658
00:01:56.882 --> 00:01:58.570 you begin your treatment,
NOTE Confidence: 0.944658
00:01:58.570 --> 00:02:00.475 and whenever you start a
NOTE Confidence: 0.944658
00:02:00.475 --> 00:02:01.618 new treatment regimen,
NOTE Confidence: 0.944658
00:02:01.620 --> 00:02:04.668 your treatment plan is made up of cycles.
NOTE Confidence: 0.944658
00:02:04.670 --> 00:02:07.154 A cycle means a period of
NOTE Confidence: 0.944658
00:02:07.154 --> 00:02:08.396 treatment with chemotherapy.
NOTE Confidence: 0.944658
00:02:08.400 --> 00:02:11.178 And medications to prevent side effects
NOTE Confidence: 0.944658
00:02:11.178 --> 00:02:14.958 followed by a period of rest or no treatment.
NOTE Confidence: 0.944658
00:02:14.960 --> 00:02:17.270 Each cycle also includes pretreatment
NOTE Confidence: 0.944658
00:02:17.270 --> 00:02:20.867 blood work and other tests to monitor how
NOTE Confidence: 0.944658
00:02:20.867 --> 00:02:23.695 you are responding to the treatment plan.
NOTE Confidence: 0.944658

00:02:23.700 --> 00:02:26.340 Treatment plans are like a complex
NOTE Confidence: 0.944658

00:02:26.340 --> 00:02:28.939 recipe with instructions for each cycle.
NOTE Confidence: 0.944658

00:02:28.940 --> 00:02:30.620 These instructions are also
NOTE Confidence: 0.944658

00:02:30.620 --> 00:02:33.750 referred to as orders like a recipe.
NOTE Confidence: 0.944658

00:02:33.750 --> 00:02:35.780 They are exact instructions for
NOTE Confidence: 0.944658

00:02:35.780 --> 00:02:38.412 pretreatment blood work for the specific
NOTE Confidence: 0.944658

00:02:38.412 --> 00:02:40.528 medications you'll be receiving.
NOTE Confidence: 0.944658

00:02:40.530 --> 00:02:43.218 And how they are to be given on
NOTE Confidence: 0.944658

00:02:43.218 --> 00:02:45.518 the first day of each treatment
NOTE Confidence: 0.944658

00:02:45.518 --> 00:02:48.395 cycle you will be seen an examined
NOTE Confidence: 0.944658

00:02:48.395 --> 00:02:51.251 by your oncologist or another team
NOTE Confidence: 0.944658

00:02:51.251 --> 00:02:53.895 member such as an oncology fellow
NOTE Confidence: 0.944658

00:02:53.895 --> 00:02:55.920 or an advanced practice provider,
NOTE Confidence: 0.944658

00:02:55.920 --> 00:02:57.448 sometimes called an APP,
NOTE Confidence: 0.944658

00:02:57.448 --> 00:02:58.976 meaning a nurse practitioner
NOTE Confidence: 0.944658

00:02:58.976 --> 00:03:00.380 or physician assistant.

NOTE Confidence: 0.944658
00:03:00.380 --> 00:03:03.194 If there are no abnormal findings and
NOTE Confidence: 0.944658
00:03:03.194 --> 00:03:06.447 your blood work is in an acceptable range,
NOTE Confidence: 0.944658
00:03:06.450 --> 00:03:08.934 your Oncologist fellow or a PP
NOTE Confidence: 0.944658
00:03:08.934 --> 00:03:10.590 clears you for treatment.
NOTE Confidence: 0.944658
00:03:10.590 --> 00:03:13.622 And you will head to the infusion area
NOTE Confidence: 0.944658
00:03:13.622 --> 00:03:16.247 during all steps of your infusion.
NOTE Confidence: 0.944658
00:03:16.250 --> 00:03:18.674 Nurses and pharmacists will use a
NOTE Confidence: 0.944658
00:03:18.674 --> 00:03:20.290 procedure called independent verification.
NOTE Confidence: 0.944658
00:03:20.290 --> 00:03:21.862 Independent verification can be
NOTE Confidence: 0.944658
00:03:21.862 --> 00:03:24.704 thought of as a double and triple
NOTE Confidence: 0.944658
00:03:24.704 --> 00:03:27.146 check on the treatment plan orders.
NOTE Confidence: 0.944658
00:03:27.150 --> 00:03:28.862 They're called independent because
NOTE Confidence: 0.944658
00:03:28.862 --> 00:03:30.574 two clinicians separately alone
NOTE Confidence: 0.944658
00:03:30.574 --> 00:03:32.410 an apart from each other,
NOTE Confidence: 0.944658
00:03:32.410 --> 00:03:34.018 check the instructions and
NOTE Confidence: 0.944658

00:03:34.018 --> 00:03:35.224 then compare results.
NOTE Confidence: 0.9433199

00:03:35.230 --> 00:03:37.701 The results must match and make sense
NOTE Confidence: 0.9433199

00:03:37.701 --> 00:03:40.489 in order to proceed with treatment.
NOTE Confidence: 0.9433199

00:03:40.490 --> 00:03:42.146 This separation ensures that.
NOTE Confidence: 0.9433199

00:03:42.146 --> 00:03:44.216 Each clinician thinks for themselves
NOTE Confidence: 0.9433199

00:03:44.216 --> 00:03:46.494 and removes the opportunity for
NOTE Confidence: 0.9433199

00:03:46.494 --> 00:03:48.294 another person to unintentionally
NOTE Confidence: 0.9433199

00:03:48.294 --> 00:03:50.318 influence what they read or hear.
NOTE Confidence: 0.9433199

00:03:50.320 --> 00:03:53.160 Two people are unlikely to make the same
NOTE Confidence: 0.9433199

00:03:53.160 --> 00:03:55.610 mistake if they work independently.
NOTE Confidence: 0.9433199

00:03:55.610 --> 00:03:58.610 You may be wondering why it is necessary
NOTE Confidence: 0.9433199

00:03:58.610 --> 00:04:01.307 to double check the doctors orders.
NOTE Confidence: 0.9433199

00:04:01.310 --> 00:04:03.525 Basically, these safety steps are
NOTE Confidence: 0.9433199

00:04:03.525 --> 00:04:05.740 standards to prevent medication errors
NOTE Confidence: 0.9433199

00:04:05.810 --> 00:04:08.138 that the American Society of clinical
NOTE Confidence: 0.9433199

00:04:08.138 --> 00:04:10.160 oncology and the Oncology Nursing

NOTE Confidence: 0.9433199

00:04:10.160 --> 00:04:12.590 Society require of all cancer centers.

NOTE Confidence: 0.9433199

00:04:12.590 --> 00:04:14.046 And on Koleji practices,

NOTE Confidence: 0.9433199

00:04:14.046 --> 00:04:16.230 there are three points at which

NOTE Confidence: 0.9433199

00:04:16.299 --> 00:04:18.535 independent verification is required

NOTE Confidence: 0.9433199

00:04:18.535 --> 00:04:20.771 prior to medication preparation

NOTE Confidence: 0.9433199

00:04:20.771 --> 00:04:22.780 during medication preparation in

NOTE Confidence: 0.9433199

00:04:22.780 --> 00:04:24.830 the pharmacy and right before

NOTE Confidence: 0.9433199

00:04:24.830 --> 00:04:26.546 your medication is administered,

NOTE Confidence: 0.9433199

00:04:26.546 --> 00:04:28.976 before your medication is prepared

NOTE Confidence: 0.9433199

00:04:28.976 --> 00:04:31.769 in the pharmacy on each and

NOTE Confidence: 0.9433199

00:04:31.769 --> 00:04:33.689 every day of your treatment,

NOTE Confidence: 0.9433199

00:04:33.690 --> 00:04:36.210 two nurses in dependently double check

NOTE Confidence: 0.9433199

00:04:36.210 --> 00:04:39.080 the orders entered by your Oncologist.

NOTE Confidence: 0.9433199

00:04:39.080 --> 00:04:41.515 Note that in some circumstances

NOTE Confidence: 0.9433199

00:04:41.515 --> 00:04:43.950 this may be a nurse.

NOTE Confidence: 0.9433199

00:04:43.950 --> 00:04:44.612 And pharmacist,
NOTE Confidence: 0.9433199

00:04:44.612 --> 00:04:46.598 the nurse that will be treating
NOTE Confidence: 0.9433199

00:04:46.598 --> 00:04:48.713 you first checks that your weight
NOTE Confidence: 0.9433199

00:04:48.713 --> 00:04:50.105 and height are accurate.
NOTE Confidence: 0.9433199

00:04:50.110 --> 00:04:50.442 Reviews.
NOTE Confidence: 0.9433199

00:04:50.442 --> 00:04:52.434 Results of your blood work and
NOTE Confidence: 0.9433199

00:04:52.434 --> 00:04:54.829 assess is that you are not having
NOTE Confidence: 0.9433199

00:04:54.829 --> 00:04:56.489 any side effects that would
NOTE Confidence: 0.9433199

00:04:56.489 --> 00:04:58.308 prevent you from being treated.
NOTE Confidence: 0.9433199

00:04:58.310 --> 00:04:59.835 Your treatment nurse then checks
NOTE Confidence: 0.9433199

00:04:59.835 --> 00:05:01.055 that the medication dosages
NOTE Confidence: 0.9433199

00:05:01.055 --> 00:05:02.420 are calculated correctly,
NOTE Confidence: 0.9433199

00:05:02.420 --> 00:05:04.472 that the order includes the correct
NOTE Confidence: 0.9433199

00:05:04.472 --> 00:05:05.498 administration route meaning,
NOTE Confidence: 0.9433199

00:05:05.500 --> 00:05:07.887 for example by Ivy injection or pill.
NOTE Confidence: 0.9433199

00:05:07.890 --> 00:05:09.942 The correct length of time and

NOTE Confidence: 0.9433199

00:05:09.942 --> 00:05:11.310 the correct treatment date.

NOTE Confidence: 0.9433199

00:05:11.310 --> 00:05:13.326 The nurse also checks if there

NOTE Confidence: 0.9433199

00:05:13.326 --> 00:05:15.580 was any change in your dosage.

NOTE Confidence: 0.9433199

00:05:15.580 --> 00:05:17.878 From your previous cycle of treatment,

NOTE Confidence: 0.9433199

00:05:17.880 --> 00:05:20.498 if one was given a second nurse

NOTE Confidence: 0.9433199

00:05:20.498 --> 00:05:22.842 independently checks all of the same

NOTE Confidence: 0.9433199

00:05:22.842 --> 00:05:25.152 information when the check is completed,

NOTE Confidence: 0.9433199

00:05:25.160 --> 00:05:27.170 the second nurse signs of

NOTE Confidence: 0.9433199

00:05:27.170 --> 00:05:29.180 verification in the medical record

NOTE Confidence: 0.9433199

00:05:29.254 --> 00:05:31.669 to attest that the order is correct.

NOTE Confidence: 0.9433199

00:05:31.670 --> 00:05:33.962 If either nurse finds a difference

NOTE Confidence: 0.9433199

00:05:33.962 --> 00:05:36.309 in what the Oncologist is ordered

NOTE Confidence: 0.9433199

00:05:36.309 --> 00:05:38.174 or finds an incorrect order,

NOTE Confidence: 0.9433199

00:05:38.180 --> 00:05:40.472 the nurse consult with the doctor

NOTE Confidence: 0.9433199

00:05:40.472 --> 00:05:41.618 or oncology pharmacist.

NOTE Confidence: 0.9433199

00:05:41.620 --> 00:05:43.918 Once this first verification is completed,
NOTE Confidence: 0.9433199

00:05:43.920 --> 00:05:46.026 your order is sent or released
NOTE Confidence: 0.9433199

00:05:46.026 --> 00:05:48.350 to the pharmacy for preparation.

00:05:48.350 --> 00:05:50.420 The oncology pharmacy staff are
NOTE Confidence: 0.9433199

00:05:50.420 --> 00:05:52.925 critical members of your cancer health

00:05:57.525 --> 00:05:59.967 treat cancer and is an invaluable
NOTE Confidence: 0.9433199

00:05:59.967 --> 00:06:02.072 resource to doctors and nurses.
NOTE Confidence: 0.9433199

00:06:02.072 --> 00:06:03.764 The oncology pharmacist reviews
NOTE Confidence: 0.9433199

00:06:03.764 --> 00:06:05.740 your medical record and checks
